- 09** Our Clients and Why ID TECH

# ABOUT US

**ID Tech Solutions Private Limited** an **ISO 9001:2015** certified company formerly known as **ID Solutions** was founded in **April 2004** to cater to the needs of Plastic Cards and Smart Cards in the Indian subcontinent.

We are the leaders in the “next generation” of Smart Cards, Plastic Cards, RFID products, Card Printers, Handheld Devices, Time Recorders, Entrance Automation Products Access Control Systems, IT and other customized solutions.

Over the past 19 years, we have grown from a company primarily providing plastic cards to **Smart Cards, RFID products, Entrance Automation Products, Track & Trace Solution & Services**, one with the capability, experience, and expertise to provide customized electronic security management focused solutions and services.

Our experience and strong mission-first work ethic has helped us develop capabilities, insights, and skills that few, system integrators can match.

# 360°RFID SOLUTION PROVIDER

- ❖ RFID Tags
- ❖ RFID Labels
- ❖ RFID Readers
- ❖ RFID Antennas
- ❖ RFID Printers

## Hardware

- ❖ Solutions Architecture
- ❖ Installation
- ❖ Hardware Selection
- ❖ POC

## Training

- ❖ Asset Management
- ❖ Inventory Tracking
- ❖ WMS
- ❖ RTLS

## Software

- ❖ Technical Support
- ❖ Warranty Spare management
- ❖ Extended Warranty Contracts
- ❖ AMCs/CMCs

## Support

# CERTIFICATIONS/MEMBERSHIPS

Manufacturing under  
MSME Licenses

ISO Certified

NABL Accredited  
Test Certificates For  
All Major Products

Registered With Small  
Scale Industries

RFID Products  
Global Certification

# Project Scope

A well known, Bank Branches handle a good quantity of Files and Packets for all its Property Loans and Gold Loan Dispersals.

## For Gold Loans

Bank employee will weigh the Gold and Count the No. of item an put them in a packet. One will manually write the gold loan no, date and unique no, weight on the packet and will putt the gold loan packet in a plastic tray.

In one tray around 10-20 Gold Loan Packets will be placed. Bank personnel will count them manually and put them in a compactor or an Almira. All the data is updated manually in Flex 2 MIS.

## For Property Loans

The Loan files are issued a barcode from the RMS Software. The files are put inside the Compactors/ Racks / Box. The Box is also issued a barcode. In certain cases the Property loan files are transferred from the branch to CPU and vice versa. The records are entered manually into the MIS.

# Pain Areas / Challenges

Manual Data Entry & Count

Time Taking  
Reconciliation Process

No Physical Identity of the  
Packet/File

No Data on The Life Cycle of  
the Packet/File

Prone to Manual Errors

# ID Tech File Tracker Solution

ID Tech RFID solutions assist the BFSI Sector in tracking, tracing and counting of documents, files and folders within a facility and across different locations

Our Solution provides organizations with an automated way of identifying and counting Files/Documents in their Branches and HQs, Search for and transfer Files, Conduct Audit checks and expedite inventory checks, leading to improved efficiency, productivity and enhanced customer service

Reconciliation  
in Minutes

Shelf/Racks  
Management

Locate  
Misplaced  
Files

Auditing

Theft  
Protection

# Need of RFID

Increase Efficiency

Reduce Data Entry Error

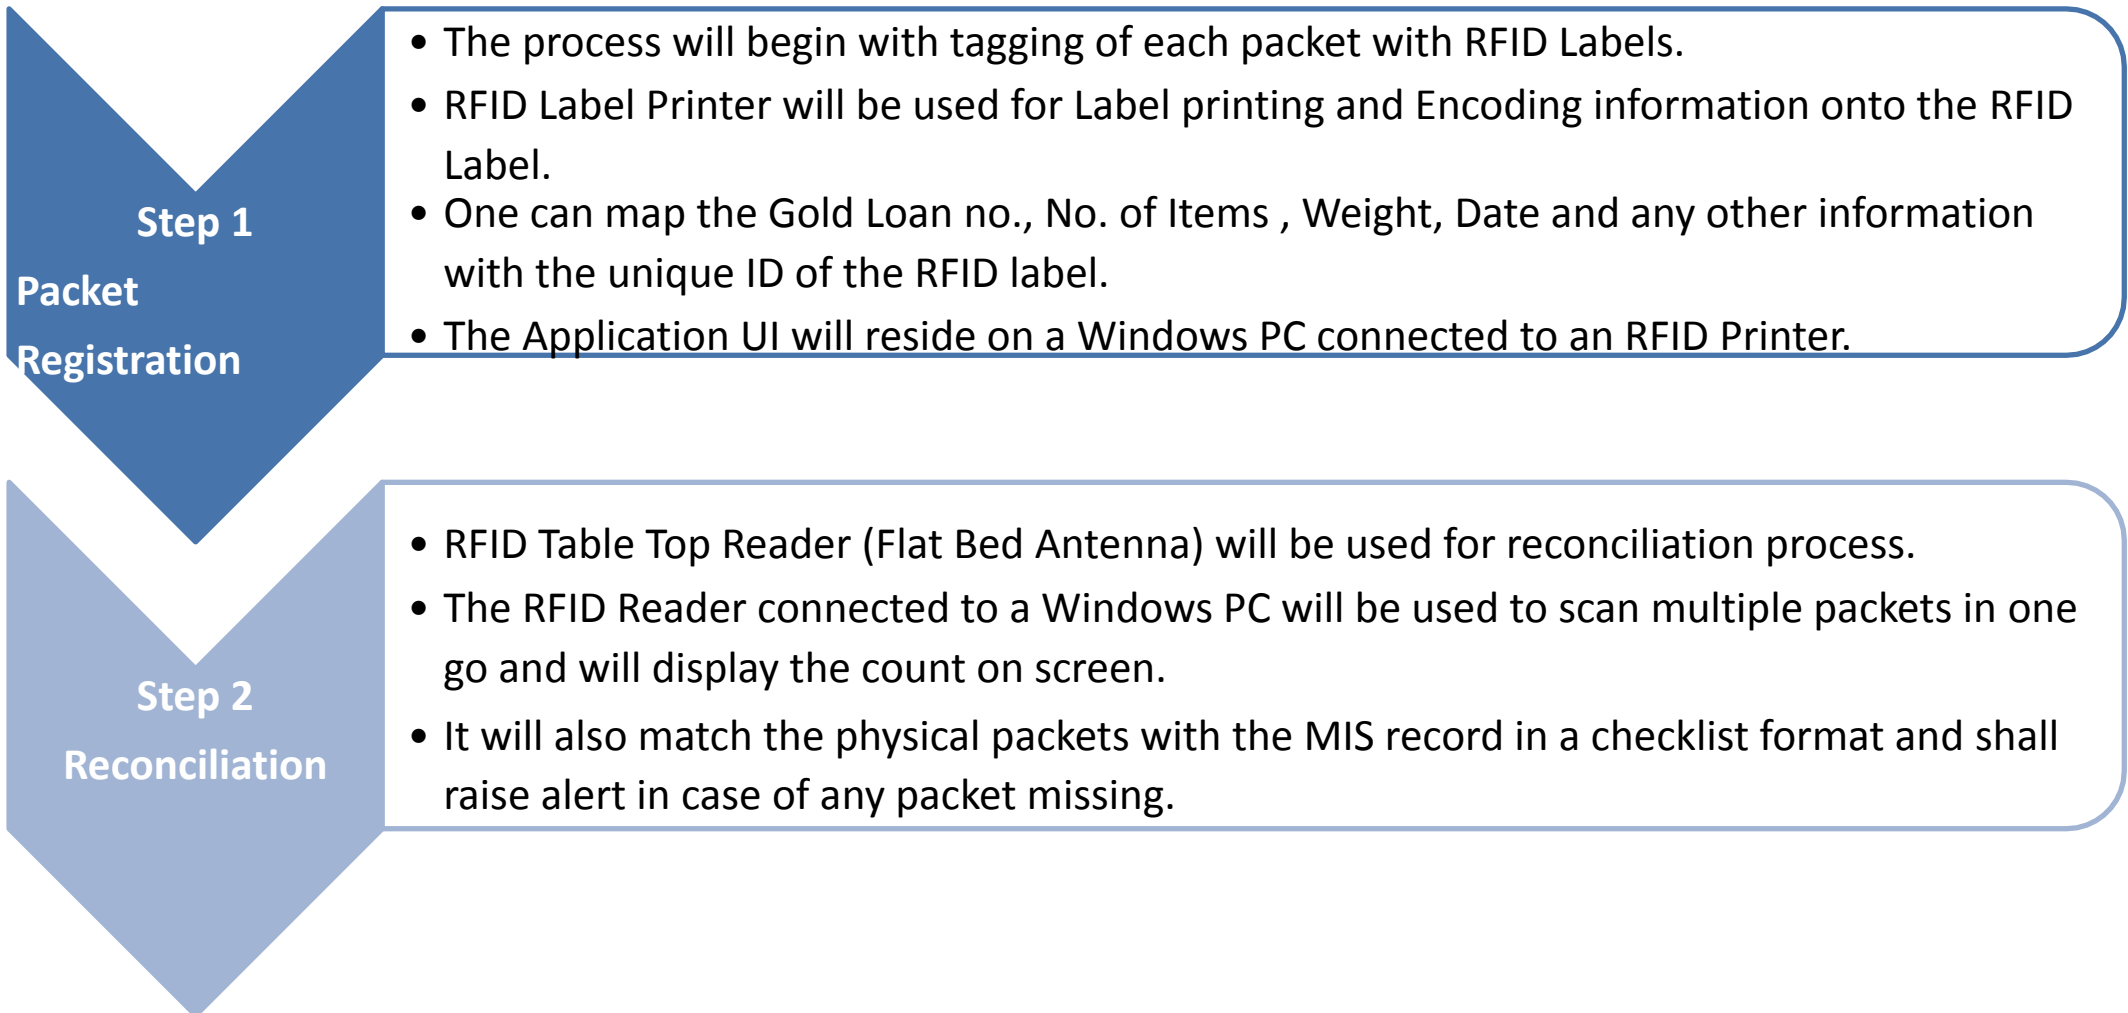

Decrease Manual Labour

Free staff to perform more value added functions

# Advantages of RFID Over Barcode

Sr. no	RFID	Barcode
1	RFID does not require line of sight.	It require line of sight because scanner must have oriented properly.
2	Once RFID tags are set up; it can be run with minimal human participation.	They are very labor intensive; as they must be scanned individually
3	Memory storage is possible in RFID with assist of tags.	Memory storage is not possible in barcodes.
4	Several RFID tags can be examined simultaneously i.e. multiple read is allowed in RFID	Only a single barcode can be scanned at a time i.e. one card can be read at a time.
5	RFID contain high levels of security; data can be encrypted, password protected.	Barcodes have less security than RFID; as they can be more easily reproduced or forged.
6	RFID tags are more reusable and rugged as they are protected by a plastic/paper cover.	If a barcode is ripped or damaged there is no way to scan the product

# Solution Proposed

# Solution Proposed - Contd.

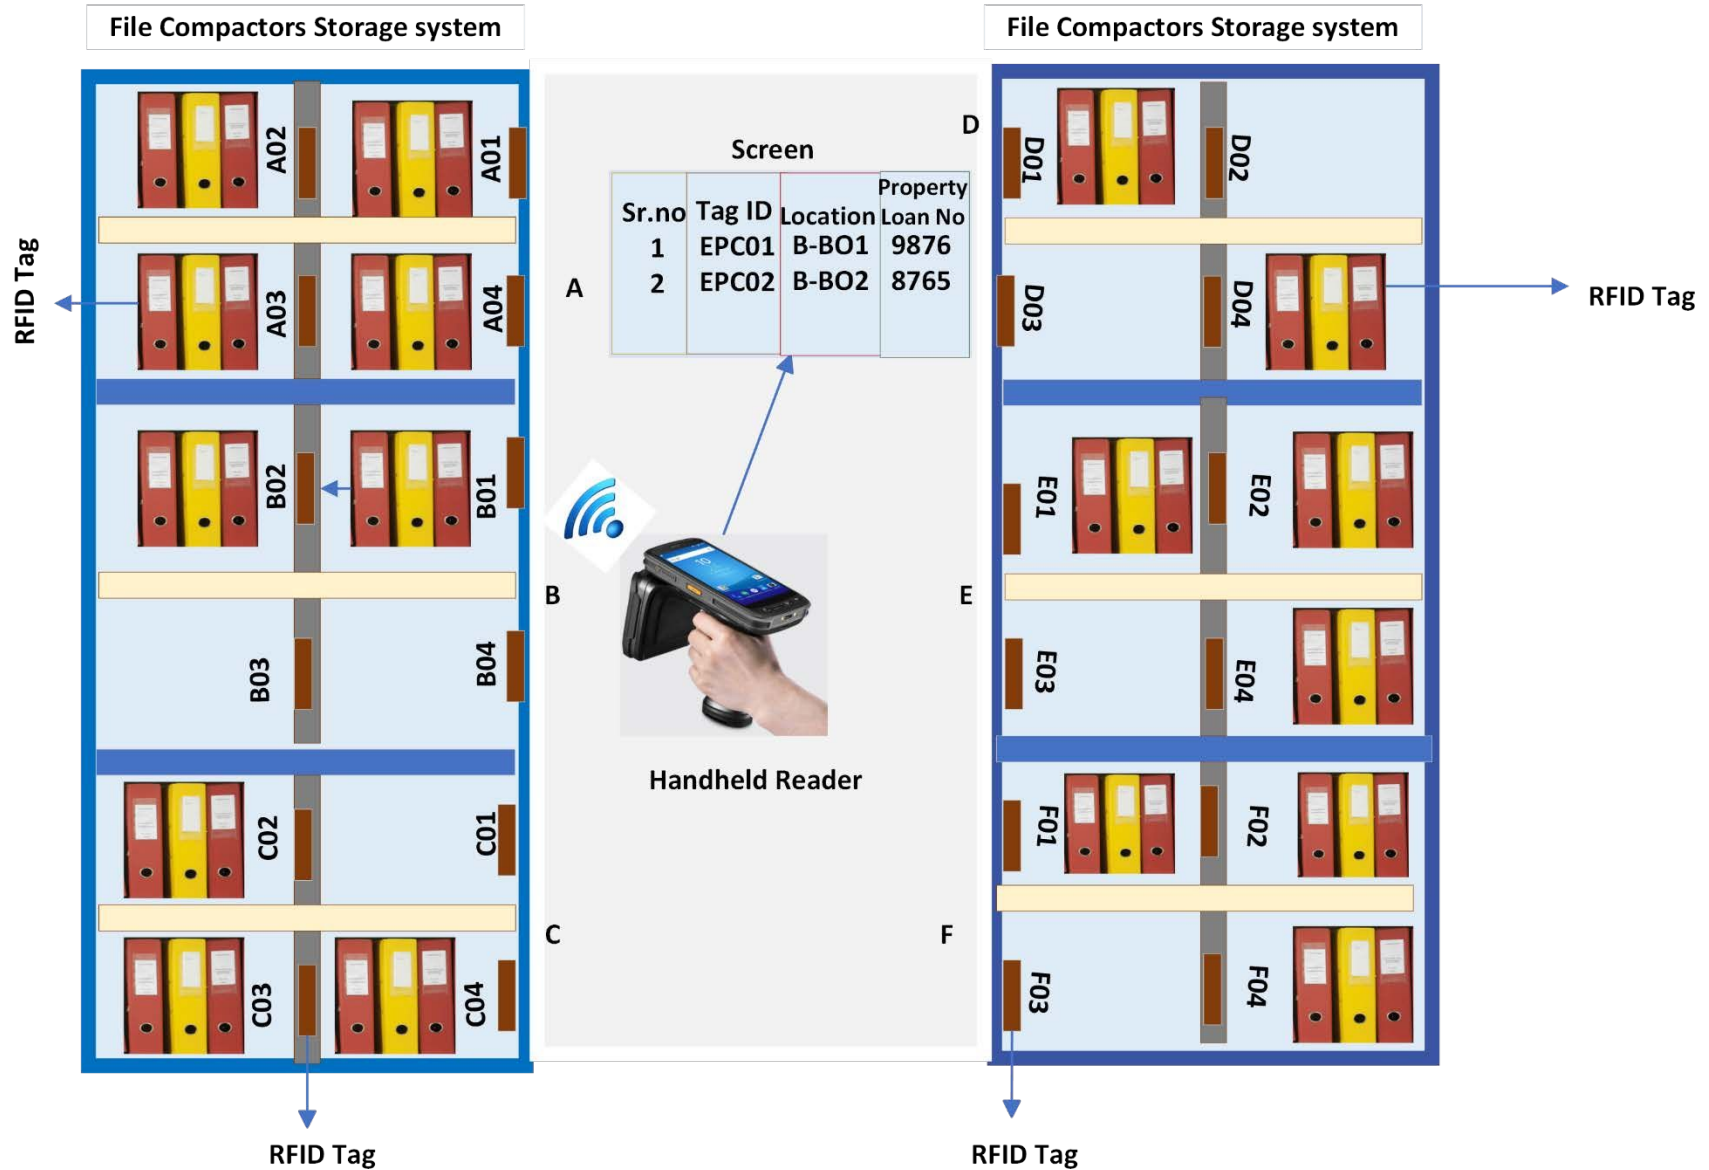

## Step 3 Searching

- RFID Handheld reader will be used when in need of a particular Gold loan packet in particular location.
- The search function allows search through loan number or unique no. by which the packet can be identified
- The RFID Handheld Reader is an Portable Mobile connected wirelessly to the Application System which can scan the packets from a distance & help you find out a packet.

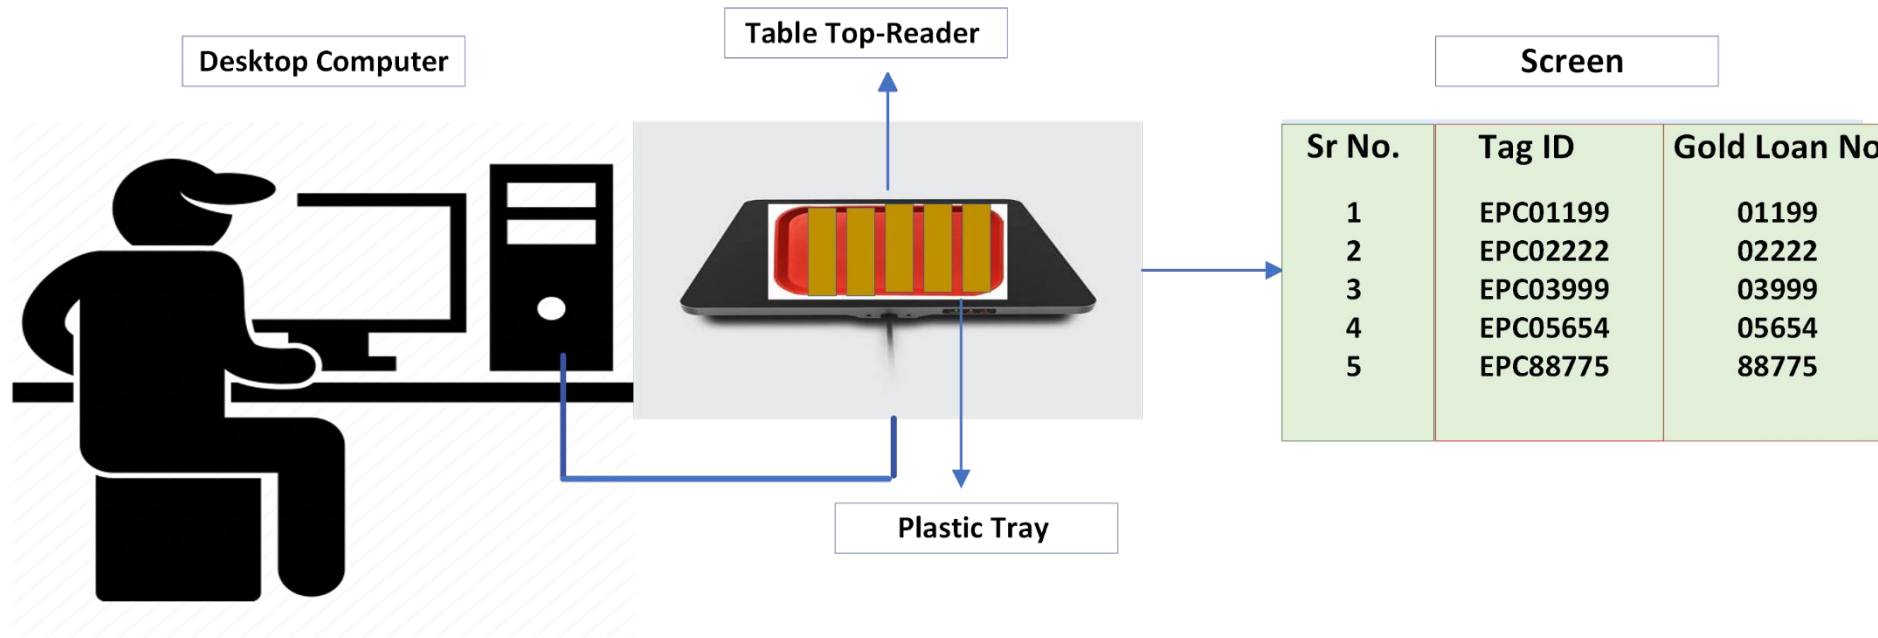

## Step 4 Identify & Tray Mapping

- As an Optional Step, the system can also map Trays and Almira/Defenders with the Gold Loan packets.
- This shall offer more precise data in terms of the location of Gold Loans Packets and its storage location.
- A combination of RFID Handheld Reader and Table Top RFID Reader will be used for this process.

# Representation - Property

# Representation – Gold Loan

# Key Components

## RFID Labels

RFID Polyester Labels  
White Face stock  
Size: Customizable  
(4 \* 1 inches)  
Permanent Printing

Tagging of Files

## RFID Handheld Readers

RFID Android Device  
Touch Screen  
5.5 inch Display  
Wi-Fi / GPRS Inbuilt

Identify , Search ,  
Inventory Operations

## RFID Table

RFID Table  
Top Reader  
Wide Surface  
Area Multiple Tag  
Scanning  
Wired/ Bluetooth

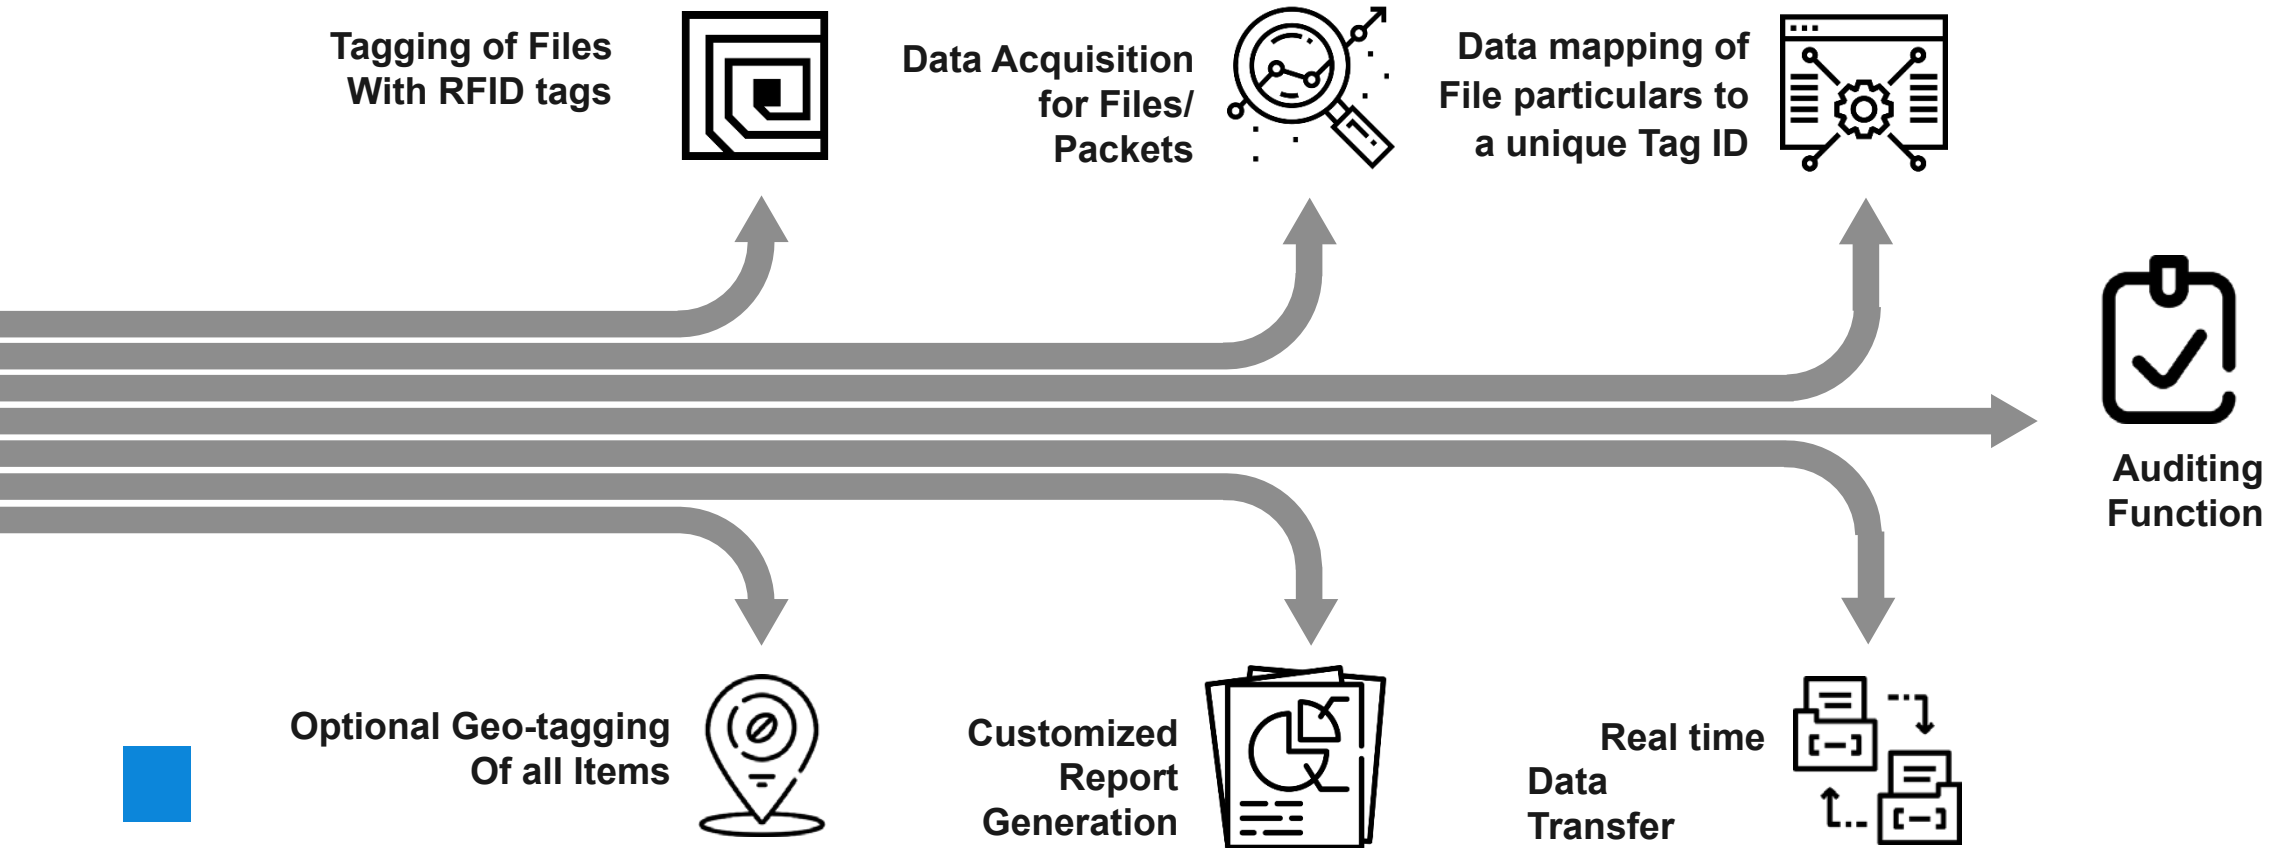

Reconciliation

## RFID Location Tags

RFID Hard Tags  
For Trays,  
Almira,  
Defenders,  
Compactors  
Location  
Identification &  
File Mapping

# Features *Application Software*

# Advantages

## Fast and time saving

Whether annually, monthly, semi-annually, or weekly, using technology can speed up the audit process, allowing staff to focus on higher-priority tasks.

## Line of Sight not required

A Line of Sight is generally not required for an RFID Reader to read a tag unlike a Barcode.

Whether annually, semi-annually, monthly or weekly, using technology can speed up audit time allowing data center staff to focus on higher-priority tasks

## Duplicity is not possible

Applicable In Inventory, Searching, Management, Identification

## Efficient

RFID tags can be read at a faster rate than barcodes; as many as approximately 40 RFID tags can be read at the same time. Also, they can be run with minimal human participation.

## Secure

RFID contain high levels of security; data can be encrypted, password protected or set to include a 'kill' feature to remove data permanently.

## Error free

Using a Tag and Reader is a simpler, more accurate method of conducting audits and maintaining inventories. It reduces human error by removing the number of steps involved in cataloging assets.

# TOP CUSTOMERS
